

This series is relatively easy to ID by feel, but there are a few areas to watch out. As always, all of the minifigures come with a 3x4 display stand, and 14 come with wands, so you can disregard those. 4 of the characters come with books or similar elements, and the Weasley twins have identical beanies, so they are easy to confuse but can be good to narrow down your options. The only difference between Ron and Hermione is their hair, but you'll want to find the Butterbeer mugs first. Kingsley is the only figure with an inner bag, which is noticeably louder when rustling.

Note: in this series the Quantity Per Case may vary. Listed is a common distribution, but not all cases may have these exact quantities.

01 Harry Potter
Key elements: 1x2 Tile, Hair
4x quantity per case
 Find the 1x2 tile first, then feel for the small, bowl-shaped hair to confirm. Both are needed for a positive ID.

02 Dumbledore
Key element: Fawkes
5x quantity per case
 Find the large Fawkes with a prominent tail. Don't confuse Fawkes with Luna's hairpiece, so feel for the dress slope to confirm.

03 Hermione
Key elements: Butterbeer, Hair
4x quantity per case
 Find the handle on the small, 1x1 round brick size mug. Then find the big hair piece to distinguish from Ron. You must find both to ID.

04 Ron Weasley
Key element: Butterbeer, Hair
4x quantity per case
 Like Hermione, find the mug first, then the hair to confirm. Ron's hair is much smaller and bowl-shaped with a jagged rim. You must find both to ID.

05 Luna Lovegood
Key element: Hair
4x quantity per case
 Luna's extra hair (not pictured on the packaging) is the best way to ID. It's ladel-shaped with a distinct ponytail.

06 Griphook
Key element: Sword of Griffindor
5x quantity per case
 The sword is a long thin piece that's slightly bendable. The cross-guard is very easy to feel.

07 Lily Potter
Key element: Infant
3x quantity per case
 The infant is about the size of a 1x2 brick, with a noticeably concave back and smooth rounded top.

08 James Potter
Key element: 2x3 Tile
4x quantity per case
 The large rectangular 2x3 tile is only in this figure. You'll feel the two round anti-studs on the back. Make sure the front is smooth to distinguish from the display stands.

09 Ginny Weasley
Key elements: Ice Cream, Sundae Dish
3x quantity per case
 The dish feels like a small barbell, while the ice cream will have an obvious rounded top. Find either element to confirm.

10 Fred Weasley
Key element: 1x1 Tile
3x quantity per case
 The only figure with a 1x1 tile. Find the tiny square tiles by shaking the bag to get them to the corner.

11 George Weasley
Key element: 2x2 Tile
3x quantity per case
 The only figure with a 2x2 tile. Make sure you feel that it's square and find the anti-stud on the back to distinguish from book covers.

12 Bellatrix Lestrange
Key elements: 1x2 Tile, Hair
3x quantity per case
 Find the huge, U-shaped hair, then locate the 1x2 tile to confirm. The hair is hard plastic, unlike Myrtle's soft hair, and is much bigger. Find both elements to ID.

13 Kingsley Shacklebolt
Key element: Broom
3x quantity per case
 Find the long broomstick with the large curving brush on one end.

14 Moaning Myrtle
Key elements: Stand, 1x2 Jumper Tile
5x quantity per case
 The two posing elements make this an easy ID. The 1x2 Jumper with its single stud is easiest.

15 Prof. Sprout
Key elements: 1x1 Round Brick, Stem
4x quantity per case
 Either element will make a positive ID. The stem has 3 distinct leaves and a thin stalk.

16 Neville Longbottom
Key element: 1x2 Cheese Slope
3x quantity per case
 The small 1x2 cheese slope should be very distinct. Make sure you feel the wedge shape to distinguish it from the 1x2 tiles.
